PLEASE READ THE FOLLOWING BEFORE ORDERING:

TERMS OF SALE: The stock offered in this list is shipped the year around except when orders exceed our supply. Fresh seed becomes available on or about July 1st. We recommend that cutting orders be placed early, but delivery be scheduled after July 1st since it is very difficult to obtain good cuttings while the plants are flowering heavily.

Cuttings are apt to yellow somewhat in transit, but they quickly recover and the condition is not serious. Every precaution is taken to make certain all cuttings are absolutely clean from disease and insects when shipped.

We can only insure our shipments against loss in transit. Therefore, we cannot accept responsibility for damage in transit or delivery.

We ship via parcel post, insured, special handling and return-receipt-requested. Should you desire some other means of shipment, advance arrangements must be made.
